Work experience

Senior Analyst/Software Engineer | Capgemini | 01/04/2023 - 27/09/2024 | Pune, India

- Awarded the Customer Delight Award for pitching and leading the transition from manual reporting to automated Power BI reports for weekly reporting, reducing by 4 hours per week of manual data compilation effort.
- Integrated REST API data sources and developed Power BI reports using DAX to deliver actionable insights and improve business decision-making. Leveraged LLMs to optimise DAX queries for performance.
- Enhanced data from API sources to deliver richer and more detailed charts, supporting deeper analytical insights for leadership.
- Managed Power BI workspace access, report ownership, and refreshes while training team members on report maintenance and future enhancements.

Analyst/Software Engineer | Capgemini | 21/09/2021 - 31/03/2023 | Pune, India

- Created dashboards in AppD for application health, business transaction performance metrics, and infrastructure metrics for multiple applications, enabling monitoring for L2/L3 teams.
- Added health rules and created policies for multiple applications in the AppDynamics controller. Integrated them with Opsgenie alerts to enhance on call support.
- Developed Python scripts to automate the generation of health status dashboards in AppDynamics controller for multiple applications, saving 2 hours of manual configuration.
- Enabled automated AppDynamics .NET agent deployments using Python and Ansible
- Provided training sessions to teams to enable support team to leverage AppDynamics for monitoring and troubleshooting.

Education & Training

Master of Science in Computer Science | RPTU Kaiserslautern | 01/10/2024 - Current | Kaiserslautern, Germany

Bachelors in Computer Engineering | University of Pune | 01/08/2017 - 01/05/2021 | Pune, India

Final grade: 1.9

Skills

Tools | Power BI | n8n | LangGraph | Docker | Excel | AppDynamics | Linux | Git | Jira

Languages | Python | SQL

Framework | Back-end (Flask, Django) | PyTorch | Sci-kit learn | NumPy | Pandas

Interpersonal Skills | Leadership | Communication | Presentation | Collaboration

Language Skills

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C2	C2	C2	C2	C1

German	B1	B1	A2	A2	A2
--------	----	----	----	----	----

Projects

Enterprise Agentic Mesh for Heterogeneous IT Systems | 18/05/2026 - Current

- Engineering a hierarchical Multi-Agent system using LangGraph featuring a centralized Master Agent coordinating specialized sub-agents tasked with automating workflows across fragmented enterprise tools (Outlook Calendar, Email, Microsoft Teams, and HR Leave Systems)
- Developing custom Model Context Protocol servers to abstract API complexities, enabling secure, standardized, and bidirectional communication between the LLM orchestration layer and corporate backend infrastructures.

Automated Job Application Tracking & State Pipeline (n8n & AI)

- Developed an automated n8n workflow that ingests unstructured emails, filters them and utilizing an LLM to accurately extract job application status metrics (e.g., Interview, Offer, Rejection).
- Deployed an isolated global error-handling framework via an Error Trigger node, programming a Discord operations bot with JavaScript expressions to stream real-time formatted diagnostic reports.

LLM Fine-Tuning for Language Translation.

- Finetuned Qwen2.5-1.5B model for German to French translation using QLoRA, resulting in increase in accuracy by 84%.
- Focused on data cleaning, prompt engineering and synthetic data generation for training to ensure high-quality model output.

Conferences & Seminars

World Creation from Egocentric devices | 01/10/2025 - 01/03/2026 | RPTU/DFKI Kaiserslautern

Bridging the gap between photorealistic rendering and semantic models by presenting a rendering pipeline with 3DGS, VIBA, and SceneScript architectures. (Full report featured on LinkedIn)
